

# Secrets and Life, Oh My!

## Spies, Detectives, and Mission (Im)Possible

(July 27-31)

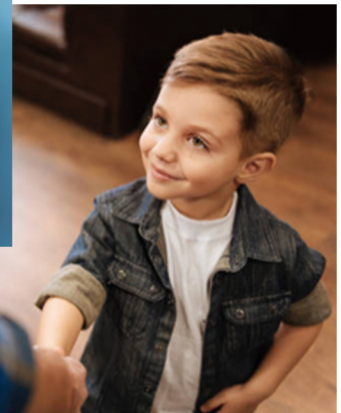

Anything is possible this summer! Complete your spy training as you decipher clues to solve daily mysteries. Use logic and reasoning skills to decode secret messages and solve riddles. Make your way through an obstacle course, develop secret identities, and create disguises to take on the assignments. Learn about spy gadgets, disappearing ink, chromatogra-

forensic chemistry, sign language, secret compartments, night vision, spy cameras, and so much more. This camp encourages students to learn about chemistry, physics, engineering, biology, forensics, and to engage in creative thinking, problem solving, and teamwork. The mission, should you choose to accept it, is to have an explosive good time!

## Life-Skills Academy (August 3-7)

This educational camp will teach the young generation what it takes to be an adult. Campers will learn fundamental life skills such as how to balance a checkbook, how to handle and save money, and how to better manage their time and stress. Campers will become junior investors for a day as they learn the basics of financial literacy.

They will further discuss how to stop 'hiding behind' electronic devices and develop successful communication and social skills, and how to discern real from fake news in today's world. They will return from the camp with better manners, as they master their body language and become aware of what is polite and acceptable behavior in the 21st century.
